Autore	Davis Sasha <1971->
Titolo	The empires' edge : militarization, resistance, and transcending hegemony in the Pacific // Sasha Davis
Pubbl/distr/stampa	Athens : , : The University of Georgia Press, , [2015] ©2015
ISBN	0-8203-4456-7 0-8203-4778-7
Descrizione fisica	1 online resource (171 pages) : illustrations
Collana	Geographies of justice and social transformation
Disciplina	355/.033095
Soggetti	Hegemony Militarism - Islands of the Pacific Militarism - Environmental aspects - Islands of the Pacific International cooperation - Philosophy Geopolitics - Islands of the Pacific Social movements - Islands of the Pacific Electronic books. Islands of the Pacific Relations Developed countries Developed countries Relations Islands of the Pacific Islands of the Pacific Politics and government Islands of the Pacific Environmental conditions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Hegemony and Affinity in the Islands of Empire -- Surveying the Baseworld -- Seeing like an Empire : Islands as Wastelands -- Local Resistances and Imperial Reactions -- Colonialism, Militarization, Tourism, and Environment as Nexus -- Networks of Affinity and Myths of the Postcolonial Pacific.
Sommario/riassunto	"In the past decade the Asia-Pacific region has become a focus of international politics and military strategies. Due to China's rising economic and military strength, North Korea's nuclear tests and missile launches, tense international disputes over small island groups in the seas around Asia, and the United States pivoting a majority of its

military forces to the region, the islands of the western Pacific have increasingly become the center of global attention. While the Pacific is a current hotbed of geopolitical rivalry and intense militarization, the region is also something else: a homeland to the hundreds of millions of people that inhabit it. Based on a decade of research in the region, *The Empires' Edge* examines the tremendous damage the militarization of the Pacific has wrought on its people and environments. Furthermore, Davis details how contemporary social movements in this region are affecting global geopolitics by challenging the military use of Pacific islands and by developing a demilitarized view of security based on affinity, mutual aid, and international solidarity. Through an examination of 'sacrificed' islands from across the region--including Bikini Atoll, Okinawa, Hawai'i, and Guam--*The Empires' Edge* makes the case that the great political contest of the twenty-first century is not about which country gets hegemony in a global system but rather about the choice between perpetuating a system of international relations based on domination or pursuing a more egalitarian and cooperative future"--

## Sommario/riassunto

The coronavirus disease 2019 (COVID-19) outbreak has spread throughout the globe and much time has passed since it was declared as a pandemic by the World Health Organization (WHO). COVID-19: Diagnosis and Management provides clinicians and scholars all the information on this disease in 2 volumes. Readers will find a concise and visual reference for this viral disease and will be equipped with the knowledge to assess and manage Sar-Cov-2 infection cases in clinical settings. This book is divided into two parts (I and II). Part I provides comprehensive information about 1 History of Coronaviruses, 2 Epidemiology of COVID-19, 3 Clinical presentation of this viral disease

and 4 COVID-19 diagnosis. Part II covers broader topics about this communicable disease including 1 the prevention and treatment methodology, 2 mortality and long-term complications, 3 COVID-19 vaccines and future perspectives. Key Features: - Covers all the aspects of COVID-19 making this a perfect textbook for virology and medical students. -Chapter wise description and segregation of topics from pathophysiology to diagnosis and management of COVID-19. -Six chapters in the first part which focus on clinical basics of COVID-19. - Six chapters in the second part which cover broader topics for practical infection control. -Multiple tables and figures which summarize and highlight important points. -Presents a summary of the current standards for the evaluation and diagnosis of COVID-19. - Features a detailed list of references, abbreviations, and symbols. This book is an essential textbook reference for medical students, scientists (virologists, pulmonologists) and public health officials who are required to understand COVID-19 diagnosis and management as part of their clinical training or professional work.
