KEY ISSUESContext: With successful landmark elections in September 2014, Fiji took a decisive stride toward returning to democratic government for the first time since 2006. The successful elections are expected to solidify the recent improvements in relationships with traditional development partners, improve access to concessional development finance, and boost confidence in the economy. In terms of economic policy, the comfortable Parliamentary majority for the former interim Prime Minister's party (FijiFirst) is expected to support continued economic reform momentum.
