1.	Record Nr.	UNINA9910463891503321
	Titolo	Techniques for predicting metal mining influenced water / / edited by R. David Williams and Sharon F. Diehl
	Pubbl/distr/stampa	Englewood, Colorado : , : Society for Mining, Metallurgy & Exploration, , 2014 ©2014
	ISBN	1-68015-381-1 0-87335-397-8
	Descrizione fisica	1 online resource (150 p.)
	Collana	Management Technologies for Metal Mining Influenced Water ; ; Volume 5
	Disciplina	628.1/6832
	Soggetti	Mine drainage - Measurement Acid mine drainage - Environmental aspects Water - Pollution - Measurement Tailings (Metallurgy) - Environmental aspects Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Sommario/riassunto	Techniques for Predicting Metal Mining Influenced Water is a must-read for planners, regulators, consultants, land managers, researchers, students, stakeholders, and others concerned about mining influenced water. Identifying potential mine wastes and their characteristics, and predicting their drainage quality are critical aspects of mine site design, operations, and closure planning. Failure to effectively conduct these evaluations for a mine site can result in environmental compliance issues that may create long-term financial liabilities. The fifth in a series of six handbooks on tech
