Sommario/riassunto	Language attitudes and ideologies are of key importance in assessing the chances of success of revitalisation efforts for endangered languages. However, few book-length studies relate attitudes to language policies, or address the changing attitudes of non-speakers and the motivations of members of language movements. Through a combination of ethnographic research and quantitative surveys, this book presents an in-depth study of revitalisation efforts for indigenous

languages in three small islands round the British Isles. The author identifies and confronts key issues commonly faced by practitioners and researchers working in small language communities with little institutional support. This book explores the complex relationship of ideologies, identity and language-related beliefs and practices, and examines the implications of these factors for language revitalisation measures. Essential reading for researchers interested in language endangerment and revitalisation, sociolinguistics, linguistic anthropology and language policy and planning, as well as language planners and campaigners.

#### Sommario/riassunto

Both dictionary and paratext research have emerged recently as widely-recognised research areas of intrinsic interest. This collection represents an attempt to place dictionaries within the paratextual context for the first time. This volume covers paratextual concerns, including dictionary production and use, questions concerning compilers, publishers, patrons and subscribers, and their cultural embedding generally. This book raises questions such as who compiled dictionaries and what cultural, linguistic and scientific notions drove this process. What influence did the professional interests, life experience, and social connexions of the lexicographer have? Who published dictionaries and why, and what do the forematter, backmatter, and supplements tell us? Lexicographers edited, adapted and improved earlier works, leaving copies with marginalia which illuminate working methods. Individual copies offer a history of ownership through marginalia, signatures, dates, places, and library stamps. Further questions concern how dictionaries were sold, who patronised them, subscribed to them, and how they came to various libraries.
