Sommario/riassunto

This book provides an analysis of the existing economic dynamics and factors contributing to entrepreneurship in China. Featuring contributions from prominent authors such as Zoltan Acs and Jian Gao, it first poses a theoretical question of whether entrepreneurship exists in China and, if so, the extent and form it takes. This book also examines whether the nature of entrepreneurship in China differs from that elsewhere. Following this investigation, empirical tests and analyses focus on important issues such as: What is the special value of entrepreneurship in China? Does entrepreneurship
