Empirical Analysis; Tables; 1. Germany: Descriptive Statistics, 1985-2007 A. Univariate Analysis: Fiscal Reaction Functions 2. Fiscal Behavior of the Old Lander, 1985-2007; 3. Behavior of Primary Expenditure for Lander, 1985-2007; 4. Robustness Check I: Behavior of Primary Expenditure for Lander, 1985-2007; B. Multivariate Analysis: VARs; 5. Robustness Check II: Behavior of Primary Expenditure; 7. Lander Behavior and Average Received Transfers, 1985-2007; 8. Output Gap Shock; V. Policy Implications and Conclusions; 9. Primary Spending Shock; Appendix I; Appendix Table 6: Unit root tests; References

Sommario/riassunto

Does reliance on transfers weaken fiscal discipline and encourage pro-cyclical fiscal policies in recipient subnational governments? Using fiscal reaction functions for a panel of the German Lander, this paper finds a positive answer to both questions. Net-recipient states (Lander, benefiting from the transfer system) have not reduced primary expenditure significantly in response to rising deficits, but have instead relied on vertical transfers from the federal government to ensure debt sustainability. Moreover, they have pursued pro-cyclical policies, particularly by raising expenditures in g
