1.	Record Nr.	UNINA9910464063103321
	Autore	Bergs Alexander
	Titolo	Social networks and historical sociolinguistics [[electronic resource]] : studies in morphosyntactic variation in the Paston letters (1421-1503) / / by Alexander Bergs
	Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2005
	ISBN	3-11-092322-X
	Descrizione fisica	1 online resource (332 p.)
	Collana	Topics in English Linguistics [TiEL] ; ; 51 Topics in English linguistics ; ; 51
	Classificazione	HE 610
	Disciplina	306.44/0942/0902
	Soggetti	Sociolinguistics - England Historical linguistics - England English language - Middle English, 1100-1500 - Grammar, Historical English language - Middle English, 1100-1500 - Variation Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references and indexes.
	Nota di contenuto	Front matter -- Proem -- Acknowledgements -- Abbreviations -- Table of contents -- Chapter 1 Introduction -- Chapter 2 Historical sociolinguistics -- Chapter 3 Social network analysis - present and past -- Chapter 4 Personal pronouns -- Chapter 5 Relative clauses -- Chapter 6 The light verb construction -- Chapter 7 Conclusion: a network perspective -- Notes -- References -- Author index -- Subject index -- Back matter
	Sommario/riassunto	The book presents an analysis of selected domains of morphosyntactic variation in a 250,000 word collection of the Middle English Paston Letters (1421-1503) from a historical sociolinguistic point of view. In the three case studies, two nominal and one verbal variable are described and discussed in detail: the replacement of Old English ‹h-› pronouns by borrowed ‹th-› pronouns, the introduction and spread of the ‹wh-› relativizers, and the spread and routinization of light verb constructions (take, make, give, have, do plus deverbal noun). While the study aims at a balanced integration of theories and methods from a number of different approaches in sociolinguistics, cognitive

linguistics, typology, and language change, its main focus is social network theory and the role of the linguistic individual in the formation and change of language structures. Questions of individual language use and of deliberate versus unmonitored changes in the (individual) system take center stage and are discussed in the light of social network analysis. Traditional empirical social network analysis is carefully revised. Despite its many merits in present-day sociolinguistics, it often needs to be supplemented by hermeneutic-biographical analyses of the individual speakers' lives when applied to historical data. With this background, common theories and models of language change, such as grammaticalization, paradigmatic pressure, typological alignment, and generational shifts, are illustrated and evaluated from the point of view of single speakers and social groups, and their particular embedding in the speech community through various network structures. The book is of interest to advanced students and researchers in English and general linguistics, Middle English, historical linguistics and language change, corpus linguistics, as well as sociolinguistics.
