climate disaster resilience of communities in Chennai, India;

Sommario/riassunto

Community disaster resilience; Chapter 8 Making Chennai resilient to climate-related disasters

How do urban communities in Asian cities experience the impacts of urbanization and climate change? This book throws light on the ongoing processes of rapid urban transformation in many cities in developing countries, with particular reference to cities such as Chennai in India. Due to increasing demands on infrastructures and urban services, cities in developing countries are often pushed to the edge of collapse even when not in times of disaster. While such cities try to implement measures to safeguard the well-being of their citizens, looming impacts of climate change such as increasingly f
