

1. Record Nr.	UNINA9910464113103321
Autore	Kalkhan Mohammed A.
Titolo	Spatial statistics : geospatial information modeling and thematic mapping / / by Mohammed A. Kalkhan
Pubbl/distr/stampa	Boca Raton, FL : , : CRC Press, an imprint of Taylor and Francis, , 2011
ISBN	0-429-11169-X 1-4200-6976-4 1-4398-9111-7
Edizione	[First edition.]
Descrizione fisica	1 online resource (178 p.)
Disciplina	910.72/7
Soggetti	Geography - Statistical methods Spatial analysis (Statistics) Thematic maps Cartography - Remote sensing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Front Cover; Contents; Preface; About the Author; Chapter 1: Geospatial Information Technology; Chapter 2: Data Sampling Methods and Applications; Chapter 3: Spatial Pattern and Correlation Statistics; Chapter 4: Geospatial Analysis and Modeling-Mapping; Chapter 5: R Statistical Package; Chapter 6: Working with Geospatial Information Data; Back Cover
Sommario/riassunto	Geospatial information modeling and mapping has become an important tool for the investigation and management of natural resources at the landscape scale. Spatial Statistics: GeoSpatial Information Modeling and Thematic Mapping reviews the types and applications of geospatial information data, such as remote sensing, geographic information systems (GIS), and GPS as well as their integration into landscape-scale geospatial statistical models and maps.
