Nota di contenuto	Front matter -- Contents -- Preface / Gärtner, Hans-Martin / Law, Paul / Sabel, Joachim -- Clause Structure and Adjuncts in Austronesian Languages: A Critical Introductory Survey / Gärtner, Hans-Martin / Law, Paul / Sabel, Joachim -- The Guest Playing Host: Adverbial Modifiers as Matrix Verbs in Kavalan / Chang, Henry Yungli -- Seediq - Adverbial Heads in a Formosan Language / Holmer, Arthur -- Patterns of Phrasal Movement: The Niuean DP / Kahnemuyipour, Arsalan / Massam, Diane -- Rigidity versus Relativity in Adverbial Syntax: Evidence from Tagalog / Kaufman, Daniel -- The Cleft Structure of Malagasy Wh-Questions / Potsdam, Eric -- Three Systems of Remnant Movement II and Extraction from Specifier Position / Thiersch, Craig -- Voice Morphology in Malagasy as Clitic Left Dislocation or Through the Looking Glass: Malagasy in Wonderland / Travis, Lisa deMena -- List of contributors -- Subject Index -- Index of Adverbials, Adjectives, and Particles
Sommario/riassunto	Clause Structure and Adjuncts in Austronesian Languages is a collection of papers devoted to the syntactic analysis of modification and extraction strategies in Austronesian languages such as Kavalan,

Malagasy, Niuean, Seediq, and Tagalog. Written by some of the leading scholars in the field, it elucidates the categorial and phrase structural status as well as the scopal behavior of sentence-level adverbs, ordering constraints on adjectival modifiers, and the nature of unbounded dependencies in interaction with Philippine-type voice systems. Guglielmo Cinque's universal ordering hypothesis for adverbs and current work on remnant movement serve as theoretical points of reference. More particularly the book contains an analysis of lower VP-adverbs in Kavalan as serial verbs (Chang), a defense of two types of adverbial heads in Seediq (Holmer), an account of possible DP-internal serializations in Niuean in terms of remnant movement (Kahnemuyipour Massam), a plea for relative, scope-based adverb ordering in Tagalog (Kaufman), a clefting approach to unbounded dependencies in Malagasy (Potsdam), a critical assessment of constraints on remnant movement as applied to adverb orderings in Malagasy (Thiersch), and an analysis of the Malagasy voice system on the basis of clitic left-dislocation (Travis). The editors' introduction undertakes a critical survey of the relevant empirical and theoretical background. A substantial part of the empirical facts are presented here for the first time, and the book will inspire additional systematic investigation of the often neglected aspects of modificational strategies in Austronesian languages. The book will be of value to linguists interested in contemporary syntactic analysis and to everyone seeking a deeper understanding of the formal properties of Austronesian.

Sommario/riassunto	Can food really take the place of medicine? While modern medicine certainly has its place and does more than its fair share of good, there is no denying that many of society's most perilous chronic diseases are exacerbated by poor diets. Whereas infectious diseases used to cause the most number of deaths, the impact of chronic diseases now far overshadows that of infectious diseases. Diet plays a significant role in the development of a number of types of chronic disease, such as heart disease, diabetes, and certain types of cancer. This title explores the

impact of dietary choices on the prevention, management, and treatment of a number of medical conditions and disease states including cardiovascular disease, diabetes and metabolic stress, critical illness, cancer, and HIV/AIDS. Conditions of the gastrointestinal tract, musculoskeletal disorders, rheumatic disease, anemias, hepatobiliary, gallbladder, pancreatic and kidney diseases are covered in the subsequent title Diet and Disease II.
