Sommario/riassunto	This paper analyzes how fiscal and monetary policy typically respond

during downturns in G7 countries. It evaluates whether discretionary fiscal responses to downturns are timely and temporary, and compares the response of fiscal policy to that of monetary policy. The results suggest that while responding more weakly and less quickly than monetary policy, discretionary fiscal policy is more timely than conventional wisdom would suggest, particularly in "Anglo-Saxon" countries, but the response differs substantially across fiscal instruments. Both fiscal and monetary policy are found to be subj
