Sommario/riassunto	Mobilization against apartheid, the campaign against blood diamonds, the women's movement in Liberia where Africa's first female head of

state was elected in 2005: these are all examples of socially based movements that have had a major effect on Africa's recent history. Yet the most influential theories concerning social movements worldwide have paid little heed to Africa, basing themselves more often on cases drawn from other continents. This volume draws together contributions from some leading writers on social movements in Africa, setting empirical studies alongside a couple of theoretical chapters. Africa's social movements have distinctive features that are related to the continent's specific history.

Sommario/riassunto	This volume provides a history of the most consequential 35mm motion picture camera introduced in North America in the quarter

century following the Second World War: the Arriflex 35. It traces the North American history of this camera from 1945 through 1972--when the first lightweight, self-blimped 35mm cameras became available. *Chronicle of a Camera* emphasizes theatrical film production, documenting the Arriflex's increasingly important role in expanding the range of production choices, styles, and even content of American motion pictures in this period. The book's exploration
