Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; I. Introduction; II. The Empirical Model; III. The Data; IV. Estimation Results; V. Conclusions; References; Tables; 1. Sample Countries; 2. Summary Statistics; 3. Cross-Correlations; 4. Baseline Regression: Two Alternative Maximum Lags; 5A. What Explains the Lack of Sustained Effect of Reforms on Financial Depth in Developing Countries? Shocks, Policies, Non-Linearities; 5B. What Explains the Lack of Sustained Effect of Reforms on Financial Depth in Developing Countries? Institutions; 6. Regressions Countries with Good Property Rights; 7. GMM Regressions 8. Regressions with 5 Year Periods Panels 9. Impact of Specific Banking Sector Reforms on Financial Depth; Figures; 1. Financial Reforms by Regions; 2. Private Credit to GDP Around Episodes of Banking Reform;

3. Financial Depth and Banking Reform Index-evolution of cross-sectional dispersion; 4. Financial Depth and Banking Reform Index-correlation over time; 5. Estimated Effect of Banking Reforms on the Private Credit to GDP Ratio; Data Appendix; Appendix; Empirical Specification

Sommario/riassunto

This paper studies whether the policies that, over the past decades, liberalized banking systems around the world have resulted in deeper credit markets. To measure banking sector reforms we use a new index that tracks policy changes in five separate areas for 91 countries over 1973-2005. We find that reforms have led to financial deepening, but only in countries with institutions that place checks and balances on political power. We interpret this as evidence of a complementarity between financial sector reforms and political institutions that protect property rights. Other country characteristics
