## Sommario/riassunto

Skills development in Ghana encompasses foundational skills, transferable/soft-skills, and technical and vocational skills. This report focuses on one segment of this skills development system: formal and informal technical and vocational education and training (TVET) at the pre-tertiary level. TVET represents a major intersection between education, youth and the labor market. The government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment. However, market distortions and inefficiencies have led to an
