Sommario/riassunto

Over the past two decades Vietnam has made enormous progress towards achieving universal coverage (UC) for its population. Significant challenges remain, however, in terms of improving equity with continuing low rates of enrollment. Ensuring financial protection also remains an elusive goal. The Master Plan for Universal Coverage approved in 2012 by the Prime Minister directly addresses both these deficiencies in coverage. The objective of this report is to assess the implementation of Vietnam SHI and provide options for moving towards UC. This is a joint assessment with development partners,
