5 Non-Removal of DNA Profiles to Protect Individual Rights

Sommario/riassunto

The surveillance society has significantly been discussed in social sciences over the last ten years. Phenomena like terrorist threats and illegal migration flows on the one hand, and an anxious Western population on the other, which seem to legitimize a considerable growth and sophistication of databases and surveillance technologies. Surveillance technologies may lead towards a more secure society for some. However, they also have a profound rearranging effect on society and may be a threat for fundamental human rights. For these reasons, social scientists have tried to slow down this fast-m
