Sommario/riassunto	This compendium gives an overview of the technologies and economics in the production of olefins in the petrochemical industries. It highlights the options and costs for producing olefins using different technologies and different feedstocks at a time when the cost of carbon dioxide emissions are set to be included in the production cost. Industry professionals, engineers, research scientists and financiers will find this title a valuable resource.

**Sommario/riassunto**

What is the use of a Targum in a cultural setting where Aramaic is not a common language anymore? And why would Christians be interested in a typically Jewish text in an otherwise anti-Jewish milieu? These and related questions have served as guides for Alberdina Houtman, Eveline van Staalduin-Sulman and Hans-Martin Kirn in bringing together the articles for the present book, which consists of three parts: 1. Uses and Functions of Targum in Europe; 2. Editing Targums and their Latin Translations; 3. Targums and Christianity. A number of the articles deal with the codicological and paratextual aspects of the relevant manuscripts and editions as witnesses of their cultural historical situations. The intended readership includes specialists in Targum, Jewish and medieval studies, (church) historians, codicologists and (Christian) theologians.
