Sommario/riassunto

Given that the greatest risk factor on any project is manpower costs, problems resulting in delays, rework, or overtime will lower profits through increased labor costs. Most of these process-generated costs are fully preventable. An in-depth exploration of the application of Lean initiatives in the construction industry, *Lean Culture for the Construction Industry: Building Responsible and Committed Project Teams* addresses employee issues in terms of productivity and waste by applying behavioral psychology principles at both tactical and strategic levels.
