| Sommario/riassunto      | The study of terminology has always occupied a unique place in the field of specialized language research. Its object, the terminology of various domains, encompasses more than just the descriptive linguistic level of lexicology and its application, specialized lexicography. Morphology, syntax and the textual level, as well as the role of culture in communication, are all fields in which terminology has its specific functions and potential. In the history of the discipline, several centers for the research and instruction of terminology emerged. However, the study of terminology in Russia has |
