Record Nr.	UNINA9910464436103321
Autore	Tarkoma Sasu
Titolo	Overlay networks : toward information networking / / Sasu Tarkoma
Pubbl/distr/stampa	Boca Raton : , : Auerbach Publications, , 2010
ISBN	0-429-07537-5 1-4398-1373-6
Descrizione fisica	1 online resource (262 p.)
Disciplina	004.6/52
Soggetti	Information networks Peer-to-peer architecture (Computer networks) Electronic data processing - Distributed processing Multimedia communications Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"An Auerbach book."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover; Contents; Preface; About the Author; Chapter 1. Introduction; Chapter 2. Network Technologies; Chapter 3. Properties of Networks and Data; Chapter 4. Unstructured Overlays; Chapter 5. Foundations of Structured Overlays; Chapter 6. Distributed Hash Tables; Chapter 7. Probabilistic Algorithms; Chapter 8. Content-based Networking and Publish/Subscribe; Chapter 9. Security; Chapter 10. Applications; Chapter 11. Conclusions; References; Index; Back cover
Sommario/riassunto	With their ability to solve problems in massive information distribution and processing, while keeping scaling costs low, overlay systems represent a rapidly growing area of R&D with important implications for the evolution of Internet architecture. Inspired by the author's articles on content based routing, Overlay Networks: Toward Information Networking provides a complete introduction to overlay networks. Examining what they are and what kind of structures they require, the text covers the key structures, protocols, and algorithms used in overlay networks. It reviews the current state of th

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Gestures in Language Development -- Editorial page -- Title page -- LCC data -- Table of contents -- About the Authors -- Preface -- Gestures and some key issues in the study of language development -- Introduction -- Gesture and language -- Gesture and first language development -- Gesture and second language development -- Gesture across the lifespan -- Common themes -- Conclusions and introduction to this volume -- Acknowledgements -- Note -- References -- Before L1 -- Before L1 -- Infant gestures -- A differentiated perspective on infant gestures -- Acknowledgements -- References -- The relationship between spontaneous gesture production and spoken lexical ability in children with Down syndrome in a naming task -- Method -- Results -- Discussion and conclusions -- Acknowledgments -- Notes -- References -- The effect of gestures

Sommario/riassunto

Gestures are prevalent in communication and tightly linked to language and speech. As such they can shed important light on issues of language development across the lifespan. This volume, originally published as a Special Issue of Gesture Volume 8:2 (2008), brings together studies from different disciplines that examine language development in children and adults from varying perspectives. It provides a review of common theoretical and empirical themes, and the contributions address topics such as gesture use in prelinguistic infants, the relationship between gestures and lexical development in typically and atypically developing children and in second language learners, what gestures reveal about discourse, and how all languages that adult second language speakers know can influence each other. The papers exemplify a vibrant new field of study with relevance for multiple disciplines.
