ISBN	1-5231-0066-4 3-11-039260-7 3-11-036750-5
Descrizione fisica	1 online resource (350 p.)
Collana	De Gruyter Textbook ; ; Volume 2
Disciplina	543/.22
Soggetti	Flow chemistry Electronic books.
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Part I. Catalysis and activation Clemens Brechtelsbauer and King Kuok (Mimi) Hii -- Part II. Cutting-edge applications in advanced and functional materials -- Part III. Additional features of the flow process: in-line analytics, safety and green principles.
Sommario/riassunto	"Flow Chemistry fills the gap in graduate education by covering chemistry and reaction principles along with current practice, including examples of relevant commercial reaction, separation, automation, and analytical equipment. The Editors of Flow Chemistry are commended for having taken the initiative to bring together experts from the field to provide a comprehensive treatment of fundamental and practical considerations underlying flow chemistry. It promises to become a useful study text and as well as reference for the graduate students and practitioners of flow chemistry." Professor Klavs Jensen Massachusetts Institute of Technology, USA Broader theoretical insight in driving a chemical reaction automatically opens the window towards new technologies particularly to flow chemistry. This emerging concept promotes the transformation of present day's organic processes into a more rapid continuous set of synthesis operations, more compatible

with the envisioned sustainable world. These two volumes Fundamentals and Applications provide both the theoretical foundation as well as the practical aspects.

Sommario/riassunto	The future of higher education depends on how managers respond to the challenge of rising costs, changing labour markets and new technologies. More people will follow some form of education programme in the next couple of decades than did previously in all of human history. Most of the capacity to accommodate this demand will be created in the global online environment. The shift in what is currently 'valued' in higher education (towards a knowledge-based economy) is driving the need for new business models. As the pace of change accelerates, education providers need to redefine their strategy
