Spinal Epidural Abscess; 12. Seizure; 13. Status Epilepticus; 14. Syncope; 15. Headache; 16. Delirium; 17. Dementia; 18. Coma and Brain Death; 19. Approach to and Management of the Patient with Weakness 20. Parkinson's Disease/Parkinsonism 21. Dystonic Reactions; 22. Neoplastic Disorders; 23. Paraneoplastic Neurologic Disorders; 24. Visual Disturbances; 25. Vertigo and "Dizziness"; 26. Other Spinal Cord Processes; GLOSSARY; APPENDIX; INDEX
Sommario/riassunto	Neurology for the Hospitalist is a concise and eminently practical resource for inpatient neurological care. Internal Medicine Hospitalists frequently face patients with neurological issues and many feel that their training was insufficient in this area. Hospitalists are often the

primary inpatient care providers for this patient population as many perceive Neurology to be an Internal Medicine subspecialty. Both new and experienced hospitalists will benefit from this handbook. In addition, medical students and residents will find this to be an excellent at the bedside resource. The format of t
