

1. Record Nr.	UNINA9910464716303321
Autore	Oreskes Naomi
Titolo	The collapse of western civilization : a view from the future // Naomi Oreskes and Erik M. Conway
Pubbl/distr/stampa	New York, New York : , : Columbia University Press, , 2014 ©2014
ISBN	0-231-53795-6
Descrizione fisica	1 online resource (105 p.)
Disciplina	909/.09821
Soggetti	Civilization, Western - Forecasting Civilization, Western - 21st century Science and civilization Progress - Forecasting Twenty-first century Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- Introduction -- 1. The Coming of the Penumbral Age -- 2. The Frenzy of Fossil Fuels -- 3. Market Failure -- Epilogue -- Lexicon of Archaic Terms -- Interview with the Authors -- Notes -- About the Authors
Sommario/riassunto	The year is 2393, and the world is almost unrecognizable. Clear warnings of climate catastrophe went ignored for decades, leading to soaring temperatures, rising sea levels, widespread drought and- finally-the disaster now known as the Great Collapse of 2093, when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order. Writing from the Second People's Republic of China on the 300th anniversary of the Great Collapse, a senior scholar presents a gripping and deeply disturbing account of how the children of the Enlightenment-the political and economic elites of the so-called advanced industrial societies-failed to act, and so brought about the collapse of Western civilization. In this haunting, provocative work of science-based fiction, Naomi Oreskes and Eric M. Conway imagine a world devastated by climate change.

Dramatizing the science in ways traditional nonfiction cannot, the book reasserts the importance of scientists and the work they do and reveals the self-serving interests of the so called "carbon combustion complex" that have turned the practice of science into political fodder. Based on sound scholarship and yet unafraid to speak boldly, this book provides a welcome moment of clarity amid the cacophony of climate change literature.
