1.	Record Nr.	UNINA9910464756003321
	Autore	Ogrodniczuk Maciej
	Titolo	Coreference : annotation, resolution and evaluation in Polish / / Maciej Ogrodniczuk [and four others]
	Pubbl/distr/stampa	Berlin, [Germany] : , : Walter de Gruyter, Inc., , 2015 ©2015
	ISBN	1-61451-838-6 1-61451-995-1
	Descrizione fisica	1 online resource (298 p.)
	Disciplina	491.8/501456
	Soggetti	Polish language - Semantics Polish language - Syntax Reference (Linguistics) Anaphora (Linguistics) Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Front matter -- Contents -- Preface -- 1. Reference, anaphora, coreference -- 2. Polish coreference-related studies -- 3. Related work -- 4. Annotation models -- 5. Annotation guidelines -- 6. Annotation methodology -- 7. Annotation tools -- 8. Polish Coreference Corpus -- 9. Resolution approaches -- 10. Mention detection -- 11. Rule-based approach -- 12. Statistical approach -- 13. Manual annotation evaluation -- 14. Evaluation approaches -- 15. Evaluation results -- 16. Conclusions -- 17. Perspectives -- Acknowledgements -- Bibliography
	Sommario/riassunto	'Coreference' presents specificities of reference, anaphora and coreference in Polish, establish identity-of-reference annotation model and present methodology used to create the corpus of Polish general nominal coreference. Various resolution approaches are presented, followed by their evaluation. By discussing the subsequent steps of building a coreference-related component of the natural language processing toolset and offering deeper explanation of the decisions taken, this volume might also serve as a reference book on state-of the

art methods of carrying out coreference projects for new languages and a tutorial for NLP practitioners. Apart from serving as a description of the fi rst complete approach to annotation and resolution of direct nominal coreference for Polish, this book is a useful starting point for further work on other types of anaphora/coreference, semantic annotation, cognitive linguistics (related to the topic of near-identity, discussed in the book) etc. With extended tutorial-like sections on important subtopics, such as evaluation metrics for coreference resolution, it can prove useful to both researchers and practitioners interested in semantic description of Balto-Slavic languages and their processing, engineers developing language resources, tools and linguistic processing chains, as well as computational linguists in general.
