Implementing performance measurement and management control for improved performance -- Part III. Behavioral implications of performance measurement and management control -- Part IV. Compensation -- Part V. Performance measurement and management control in governmental and non profit organizations.
Sommario/riassunto	This new volume contains selected papers that were presented at the 2013 conference on performance measurement and management control focusing on behavioral implications and human actions associated with the use of performance measurement and management control systems. These systems do not work in a vacuum, rather they guide and motivate how people in organizations and markets behave. The intersection between management tools and human action is a central aspect in these research fields. Yet, multiple variables impact the result of certain designs on the behavior of people.
