Sommario/riassunto	Die vorliegenden Bände versammeln jene Briefe, die Bertolt Brecht während der Zeit seines Exils (1933-1949) erhielt. Es handelt sich dabei um bisher zum größten Teil unveröffentlichte Briefe (Initial- ebenso wie Antwortbriefe), die komplementär zu Brechts eigenen Briefen, publiziert in der Großen Berliner und Frankfurter Ausgabe, erstmals einen umfassenden Einblick geben in seine Beziehungen zu Freunden, Geliebten, Mitarbeitern, Genossen und Geschäftspartnern. Auch über Brechts äußerst vielfältige Produktion im Exil gibt die Korrespondenz aus ganz unterschiedlichen Perspektiven Aufschluss. Von herausragender kulturgeschichtlicher Bedeutung, dokumentieren die hier versammelten Briefe das intellektuelle Leben der 1930er und 1940er Jahre in Europa und Amerika sowie die persönliche Situation vieler Intellektueller und Künstler. Unter Brechts Briefpartnern jener Jahre finden sich so bedeutende Namen wie Walter Benjamin, Arnold Zweig, Lion Feuchtwanger, Ernst Bloch, George Grosz, Erwin Piscator, Heinrich und Thomas Mann. Die Briefe werden durch eine Einleitung, Kommentare und Indizes erschlossen.

Nota di contenuto	1. Diabetes: An approach from the Social Psychology of Health -- 2. How do attachment style, optimism, resilience, and self-efficacy impact stress and its control in patients with diabetes? -- 3. Effects of loneliness, rumination, and stress on healthy behaviors of people with diabetes based on their ability to receive support and self-confidence -- 4. The importance of social support and the ability to receive it in the subjective well-being and quality of life of the diabetic patient -- 5. Altruism, uncontrollability and affectivity in the physical health of diabetes patient's partners -- 6. The emotional life of the patient with diabetes's partner -- 7. Negative emotions and conflict in the diabetic couple -- 8. Relationship between Communication styles and marital satisfaction in the couple with diabetes -- 9. Emotional warmth and empathy in the satisfaction with the relationship of couples with diabetes -- 10. Diabetes and Couple Relationships: A Ray of Light.

This book shows how psychological aspects of individuals and of couple relationships can work as both protective or risk factors to the health of diabetes patients and their partners. Departing from a social psychological perspective, it analyzes how individual attributes and personal relationships influence health, focusing on the impacts that diabetes as a chronic-degenerative disease has on the psychological state of the patient and on their most immediate social context. The volume is divided in three parts: the first focuses on the patient, the second on the partner and the third on the couple relationship. The first part examines how attachment styles, optimism, resilience, self-efficacy in emotional regulation, loneliness and rumination impact the stress experienced by the diabetic patient. The second part analyzes how the partner's altruism, affectivity, jealousy, criticism or indifference affects the physical health of the diabetic patient. Finally, the third part explores the relationship between negative emotions and the couple's motives of conflict, as well as the effects of the communication styles used, emotional warmth and empathy in the satisfaction with the relationship in couples where one of the members is a diabetes patient. *Diabetes and Couple Relationship: Protective and Risk Factors* will be a valuable resource for researchers, students and professionals in the fields of health and clinical psychology, social psychology and public health interested in better understanding how personal characteristics and relationships can affect the physical and psychological health of chronic disease patients, as well as their well-being and quality of life. .
