1. Record Nr.    UNINA9910464790903321

Titolo    Sampling and monitoring for the mine life cycle / / edited by Virginia T. McLemore, Kathleen S. Smith, and Carol C. Russell

Pubbl/distr/stampa    Englewood, Colorado : , : Society for Mining, Metallurgy & Exploration, , 2014
©2014

ISBN    1-5231-3821-1
0-87335-398-6

Descrizione fisica    1 online resource (814 p.)

Collana    Management Technologies for Metal Mining Influenced Water ; ; Volume 6

Disciplina    628.1/6832

Soggetti    Mines and mineral resources - Environmental aspects
Runoff
Groundwater - Pollution
Water - Sampling
Environmental monitoring
Electronic books.

Lingua di pubblicazione    Inglese

Formato    Materiale a stampa

Livello bibliografico    Monografia

Note generali    Description based upon print version of record.

Nota di bibliografia    Includes bibliographical references and index.

Nota di contenuto    Cover; Title Page; Copyright; Contents; Preface; Chapter 1: Introduction; 1.1 Synopsis; 1.2 Organization of This Handbook; 1.3 Role of this Handbook; 1.4 Importance of Defining Questions; 1.5 Sampling and Monitoring for Closure; 1.6 Terminology; Chapter 2: Sampling and Monitoring During the Mining Phases; 2.1 Introduction; 2.2 Exploration (Premining/Undisturbed); 2.3 Mine Development; 2.4 Operations; 2.5 Closure/Postclosure; 2.6 Historical, Inactive, and Abandoned Mines; 2.7 Summary; Chapter 3: Sampling Considerations in the Mining Environment; 3.1 Introduction; 3.2 Sampling Overview 3.3 Water Sampling Considerations3.4 Solid Sampling Considerations; 3.5 Drillhole/Borehole Sampling Considerations; 3.6 Biological Sampling Considerations-Aquatic; 3.7 Air Sampling Considerations; 3.8 Quality Assurance/Quality Control Considerations; 3.9 Analytical Chemistry Considerations; 3.10 Contamination Considerations; 3.11

| Sommario/riassunto | Sampling and Monitoring for the Mine Life Cycle provides an overview of sampling for environmental purposes and monitoring of environmentally relevant variables at mining sites. It focuses on environmental sampling and monitoring of surface water, and also considers groundwater, process water streams, rock, soil, and other media including air and biological organisms. The handbook includes an appendix of technical summaries written by subject-matter experts that describe field measurements, collection methods, and analytical techniques and procedures relevant to environmental sampling and moni |
