   Sommario/riassunto   Discourse analysis remains an unresolved challenge in Computational
                        Linguistics, in spite of the numerous theoretical works that have been
                        developed in the past two decades. This situation is mainly due to the
                        complexity of discourse constructions whose recognition often involves
                        language analysis associated with domain knowledge and reasoning.
                        Technical documents, such as procedures, requirements, and product
                        manuals, must be relatively constrained in terms of language diversity
                        and complex...
