

1. Record Nr.	UNINA9910464828803321
Autore	Rastogi Cordula
Titolo	The Eurasian connection : supply-chain efficiency along the modern Silk Route through Central Asia / / Cordula Rastogi and Jean-Francois Arvis
Pubbl/distr/stampa	Washington, District of Columbia : , : The World Bank, , 2014 ©2014
ISBN	0-8213-9913-6
Descrizione fisica	1 online resource (133 p.)
Collana	Directions in Development
Disciplina	382.0958
Soggetti	Business logistics - Asia, Central Trade routes - Asia, Central Transportation - Asia, Central Electronic books. Silk Road
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	From the old to the modern Silk Route -- Connecting Central Asia to the world -- Rail freight transit along the modern Silk Route -- Road transport connections along the modern Silk Route -- Supply-chain efficiency and logistics costs -- Underlying obstacles to supply-chain efficiency -- Improving the eurasian connection.
Sommario/riassunto	The Modern Silk Route is offering a potential land-bridge between China and Europe through Central Asia and Russia that offers a complement to existing shipping routes, and is attracting growing interest by a selected number of multinational companies. However, the main role of the Silk Route is to support the development and integration of the region. Connectivity to the east and west, over exceptionally long distances, is critical to the development of the Central Asian countries, when trading globally and between themselves. Facilitating trade and transportation across many borders, remains
