Nota di contenuto	Introduction : governance and advocacy for immigrants -- Trajectories of the governance-advocacy linkage -- National policy advocacy in recent countries of immigration -- Policy change in Japan : the national view -- Japan's local governments and the emerging governance system -- Japan's nongovernmental advocacy : webs of national activism and local governance -- Governance across levels in recent countries of immigration -- Shocks to the system : the impact of economic and political crises -- Conclusion : advocacy toward inclusion?.
Sommario/riassunto	In recent decades, many countries have experienced both a rapid increase of in-migration of foreign nationals and a large-scale devolution of governance to the local level. The result has been new government policies to promote the social inclusion of recently arrived residents. In New Policies for New Residents, Deborah J. Milly focuses on the intersection of these trends in Japan. Despite the country's history of restrictive immigration policies, some Japanese favor a more

accepting approach to immigrants. Policies supportive of foreign residents could help attract immigrants as the country adjusts to labor market conditions and a looming demographic crisis. As well, local citizen engagement is producing more inclusive approaches to community. Milly compares the policy discussions and outcomes in Japan with those in South Korea and in two similarly challenged Mediterranean nations, Italy and Spain. All four are recent countries of immigration, and all undertook major policy innovations for immigrants by the 2000's. In Japan and Spain, local NGO-local government collaboration has influenced national policy through the advocacy of local governments. South Korea and Italy included NGO advocates as policy actors and partners at the national level far earlier as they responded to new immigration, producing policy changes that fueled local networks of governance and advocacy. In all these cases, Milly finds, nongovernmental advocacy groups have the power to shape local governance and affect national policy, though in different ways.

Per molto tempo i poteri pubblici, i singoli individui e le autorità religiose del mondo cristiano fecero di nascosto la "cosa innominabile" che questo libro riporta alla luce: si appellarono ai turchi per risolvere i loro più disparati problemi personali o politici. Ciò accadde soprattutto nell'Italia del Rinascimento, e nell'esercizio si segnalano persino alcuni papi in conflitto con altri principi cristiani. Il libro analizza le permeabilità della linea di cesura fra cristiani e musulmani, senza farsi ingannare dalle deplorazioni lanciate dai contemporanei. Vengono raccontati scambi di lettere e di emissari, trattative segrete e offerte di doni, azioni di spionaggio e depistaggio nel periodo che va dalla conquista di Costantinopoli nel 1453 alla battaglia di Lepanto nel 1571. Malgrado la retorica di crociata, l'accesso della potenza turca al tavolo diplomatico europeo precedette di molto l'instaurazione di un sistema di relazioni internazionali dichiaratamente laiche.
