Sommario/riassunto	Part of the Oxford American Neurology Library, Parkinson's Disease: Improving Patient Care is a clinically-focused text for healthcare professionals involved in the everyday management of Parkinson's disease patients. Primary care physicians, general neurologists, medical trainees, and ancillary therapists including mental health professionals, speech therapists, and physical therapists will all find helpful information regarding caring for patients with Parkinson's disease. The

easily readable text provides information on the diagnosis of
Parkinson's disease and everyday management of patient
