Note generali Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Prediction and intelligence: the dominant approach in force planning and its failure to answer the challenge of technological and doctrinal surprise -- Conceptual and doctrinal flexibility -- Organizational and technological flexibility -- Cognitive and command and control (C2) flexibility -- The mechanism for lesson learning and rapid dissemination -- The German recovery from the surprise of British chaff -- The German recovery from the Soviet T-34 tank surprise --The Israeli recovery from the Egyptian Sagger missile surprise -- The Israeli air force recovery from the Arab anti-aircraft missile surprise --The slow British recovery from the German armor and anti-tank tactics -- The slow Soviet recovery from the surprise of low-intensity conflict in Afghanistan -- The French failure to recover from the surprise of the

German blitzkrieg.

Sommario/riassunto

This book addresses one of the basic questions in military studies: How can armies cope effectively with technological and doctrinal surprisesones that leave them vulnerable to new weapons systems and/or

combat doctrines? Author Meir Finkel contends that the current paradigm-with its over-dependence on intelligence and an all-out effort to predict the nature of the future battlefield and the enemy's capabilities-generally doesn't work. Based on historical case analysis of successful ""under-fire"" recovery and failure to recover, he identifies the variables that have dete
