Attachment, trauma and brain development

Sommario/riassunto

This book examines a range of therapeutic approaches used in prisons and other secure settings and explores the challenges in such work. The approaches include Cognitive-Behavioural Therapy (CBT), Cognitive-Analytic Therapy (CAT), Attachment-Based Psychodynamic Psychotherapy and Systemic Psychotherapy. It provides insights into debates about providing therapy in prisons and other secure settings and discusses specific topics such as mental health in-reach teams, working with women in prison, therapy within therapeutic communities and therapy with black and minority ethnic groups.<
