Sommario/riassunto	Teaching is becoming increasingly complex in the 21st Century, creating a need for more sophisticated frameworks to support teachers' professional learning. Action learning is one such framework and has been used for workplace learning in business settings for many years. It is now becoming increasingly popular in school and university settings, but it is often misunderstood. This book clarifies what action learning

is, linking key concepts to illustrate that it is not merely a process, but a dynamic interaction between professional learning, communities, leadership and change. T
