The importance of scholarship to practice; Notes; Select bibliography; Index
Sommario/riassunto	This book on intelligence analysis written by intelligence expert Dr. Stephen Marrin argues that scholarship can play a valuable role in improving intelligence analysis. Improving intelligence analysis requires bridging the gap between scholarship and practice. Compared to the more established academic disciplines of political science and international relations, intelligence studies scholarship is generally quite relevant to practice. Yet a substantial gap exists nonetheless. Even though there are many intelligence analysts, very few of them are

aware of the various writings
