Sommario/riassunto	This book examines how the liberal peace experiment of the post-Cold War environment has failed to connect with its target populations,

which have instead set about transforming it according to their own local requirements. Liberal peacebuilding has caused a range of unintended consequences. These emerge from the liberal peace's internal contradictions, from its claim to offer a universal normative and epistemological basis for peace, and to offer a technology and process which can be applied to achieve it. When viewed from a range of contextual and local perspectives, these top-down
