Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. New directions in the study of children and marital conflict -- pt. 2. Child effects of exposure to marital conflict -- pt. 3. Contextualizing marital conflict -- pt. 4. Future directions -- Appendices : coding systems and methodology.
Sommario/riassunto	From leading researchers, this book presents important advances in understanding how growing up in a discordant family affects child adjustment, the factors that make certain children more vulnerable than others, and what can be done to help. It is a state-of-the-science follow-up to the authors' seminal earlier work, Children and Marital Conflict: The Impact of Family Dispute and Resolution. The volume presents a new conceptual framework that draws on current knowledge about family processes; parenting; attachment; and children's emotional, physiological, cognitive, and behavior
