Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Acknowledgments -- Introduction -- Land, identity, and self-determination -- Land, market, and morality -- Migration, resettlement, and integration -- Conclusion -- Bibliography.
Sommario/riassunto	This book, from ethical, interdisciplinary, and African perspectives, unveils the root causes of the increasing land disputes. Its significance lies upon the effort of presenting a broad overview founded upon a critical analysis of the existing land-related disputes. It is a perspective that attempts to evaluate the renewed interest in evolving theories of land rights by raising questions that can help us to understand better differences underlying land ownership systems, conflict between customary and statutory land rights systems, and the politics of land reform. Other dimensions explored in the book include the market influence on land-grabbing and challenges accompanying trends of migration, resettlement, and integration. The methodology applied in the study provides a perspective that raises questions intended to identify areas of contention, dispute, and conflict. The study, which could also be categorized as a critical assessment of the African land rights systems, is intended to be a resource for scholars, activists, and organizations working to resolve land-related disputes.

Classificazione	LC 17517
Soggetti	Public Health Health & Biological Sciences Public Health - General
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	<p>Ce XI<sup>e</sup> colloque du réseau de recherche pluridisciplinaire Méga-Tchad traite du thème de l'alimentation dans une région très contrastée, tant du point de vue des sociétés qui la composent que des contextes écologiques, économiques et politiques. Au-delà de la prise en compte des besoins vitaux des hommes, cet ouvrage considère à la fois la demande spécifique des populations – goûts, choix et stratégies de subsistance –, les systèmes de productions vivrières et les environnements physiques et humains. Les manières de se nourrir et les relations sociales qui se tissent autour de la nourriture et du repas sont également abordées. La persistance d'un code culinaire très ancien est démontrée, alors même que l'on assiste à une grande diversification et à une évolution importante de la nature des produits utilisés. Les chercheurs, les étudiants, mais aussi les décideurs et les acteurs du développement trouveront ici une source d'informations récentes et rigoureuses, dans un cadre pluridisciplinaire posant les nouvelles problématiques relatives à la question de l'alimentation en Afrique. The 11th meeting of the multidisciplinary research network MégaTchad addresses the subject of diet in a région that displays great contrasts in both societies and the ecological, economic and political</p>

contexts. In addition to taking the vital needs of humans into account, this work examines the specific demand of populations and their tastes, choices and subsistence strategies, food production systems and the physical and human environments. Ways of eating and the social relations that develop around food and meals are also addressed. The persistence of a very ancient culinary code is demonstrated whereas great diversification and considerable evolution in the nature of the products used are observed. Scientists, students and also decision makers and development stakeholders will find the book a source of recent, rigorous information in a multidisciplinary framework that raises fresh...
