

1. Record Nr.	UNINA9910465043003321
Autore	Gonzalo Roberto
Titolo	Passive house design : planning and design of energy-efficient buildings // Roberto Gonzalo, Rainer Vallentin
Pubbl/distr/stampa	Munich, [Germany] : , : Institut fur Internationale, , 2014 2014
ISBN	3-95553-221-6
Descrizione fisica	1 online resource (152 pages) : illustrations (some color), graphs
Collana	Edition Detail Green Books
Disciplina	728.047
Soggetti	Architecture and energy conservation Architecture - Environmental aspects Sustainable buildings - Design and construction Architecture, Domestic - Environmental aspects Ecological houses Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Frontmatter -- Imprint -- Contents -- Introduction -- Principles -- Passive House planning -- Design and planning principles -- Reference buildings - residential -- Urban design -- Non-residential building -- Reference buildings - non-residential -- Passive House refurbishment -- Reference buildings - Passive House refurbishments -- Building envelope components -- Building services -- Outlook -- Appendix
Sommario/riassunto	"Passive House Design" provides architects with the confidence required to deal with the Passive House Standard. It shows where there is significant scope for design and explains design strategies that lead to better passive houses. A selection of international buildings illustrate how design, construction and building technology combine in passive houses. Chapters on building physics, building services engineering and energy balancing round out the planning guidelines.
