Sommario/riassunto

Over the last decade, the field of plant ecology has significantly developed and expanded, especially in research concerning the herbaceous layer and ground vegetation of forests. This revised second edition of *The Herbaceous Layer in Forests of Eastern North America* accounts for that growth, presenting research that approaches the ecology of the herb layer of forests from a variety of disciplines, perspectives, and levels of ecological organization. The book synthesizes the research of top ecologists on herbaceous layer structure, composition, and dynamics of a variety of forest ecosystem typ
