| Nota di contenuto | Introduction : the meanings of medieval superstition -- The weight of tradition -- Superstition in court and cloister -- The cardinal, the confessor, and the chancellor -- Dilemmas of discernment -- |

Sommario/riassunto

Superstitions are commonplace in the modern world. Mostly, however, they evoke innocuous images of people reading their horoscopes or avoiding black cats. Certain religious practices might also come to mind-praying to St. Christopher or lighting candles for the dead. Benign as they might seem today, such practices were not always perceived that way. In medieval Europe superstitions were considered serious offenses, violations of essential precepts of Christian doctrine or immutable natural laws. But how and why did this come to be? In *Fearful Spirits, Reasoned Follies*, Michael D. Bailey explores the thorny concept of superstition as it was understood and debated in the Middle Ages. Bailey begins by tracing Christian thinking about superstition from the patristic period through the early and high Middle Ages. He then turns to the later Middle Ages, a period that witnessed an outpouring of writings devoted to superstition-tracts and treatises with titles such as *De superstitionibus* and *Contra vitia superstitionum*. Most were written by theologians and other academics based in Europe's universities and courts, men who were increasingly anxious about the proliferation of suspect beliefs and practices, from elite ritual magic to common healing charms, from astrological divination to the observance of signs and omens. As Bailey shows, however, authorities were far more sophisticated in their reasoning than one might suspect, using accusations of superstition in a calculated way to control the boundaries of legitimate religion and acceptable science. This in turn would lay the conceptual groundwork for future discussions of religion, science, and magic in the early modern world. Indeed, by revealing the extent to which early modern thinkers took up old questions about the operation of natural properties and forces using the vocabulary of science rather than of belief, Bailey exposes the powerful but in many ways false dichotomy between the "superstitious" Middle Ages and "rational" European modernity.

3. Record Nr.	UNISALENTO991000328639707536
Autore	Federzoni, Giovanni
Titolo	Il canto 24. del Purgatorio / letto da Giovanni Federzoni nella Sala di Dante in Orsanmichele
Pubbl/distr/stampa	Firenze : G.C. Sansoni, [1910?]
