Sommario/riassunto	Every industrial nation in the world guarantees their citizens access to essential health care services - every country, that is, except the United

States. Indeed, one in eight Americans - a shocking 43 million people - a majority of them in working families, do not have any health care insurance. ""One Nation, Uninsured"" offers a vividly written, path-breaking history of America's failed efforts to address the health care needs of its citizens. Ranging across the 20th century, Jill Quadagno shows how each attempt to enact national health insurance was met with fierce attacks by powerful stakeholders.
