Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. Introduction -- part II. Chalcolithic cemeteries -- part III. Contemporary cemeteries -- part IV. Conclusion.
Sommario/riassunto	Death, grief and funerary practices are central to any analysis of social, anthropological, artistic and religious worlds. However, cemeteries - the key conceptual and physical site for death - have rarely been the focus of archaeological research. Prioritizing Death and Society examines the structure, organisation and significance of cemeteries in the Southern Levant, one of the key areas for both migration and settlement in both prehistory and antiquity.
