Discrimination: From the Makana Football Association to Europe -- ACKNOWLEDGMENTS -- REFERENCES -- INDEX
Sommario/riassunto	A wealth of research in recent decades has seen the economic approach to human behavior extended over many areas previously considered to belong to sociology, political science, law, and other fields. Research has also shown that economics can provide insight into many aspects of sports, including soccer. Beautiful Game Theory is the first book that uses soccer to test economic theories and document novel human behavior. In this brilliant and entertaining book, Ignacio Palacios-

Huerta illuminates economics through the world's most popular sport. He offers unique and often startling insights into game theory and microeconomics, covering topics such as mixed strategies, discrimination, incentives, and human preferences. He also looks at finance, experimental economics, behavioral economics, and neuroeconomics. Soccer provides rich data sets and environments that shed light on universal economic principles in interesting and useful ways. Essential reading for students, researchers, and sports enthusiasts, Beautiful Game Theory is the first book to show what soccer can do for economics.

2. Record Nr.	UNINA9910130753603321
Autore	Feiler Harald

Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Markenrechtsverletzungen beeinträchtigen die mit Markenrechten einhergehenden sozioökonomischen Vorteile für Produzenten, Händler, Verbraucher und die Allgemeinheit. Die vorliegende Untersuchung setzt sich mit Fragen der subjektiven Tatseite im Markenstrafrecht auseinander. Dazu entwickelt der Verfasser zunächst ein grundlegendes allgemeines System der strafrechtlichen subjektiven Zurechnung. Dieses wird sodann zur Lösung der Probleme der

subjektiven Tatseite bei Markenstraftaten ausgearbeitet. Dabei werden die Einflüsse nicht nur der spezifischen markenstrafrechtlichen Besonderheiten eingehend durchleuchtet, sondern auch diejenigen der rechtstatsachlichen Aspekte des Markenstrafrechts wie etwa dessen Zugehörigkeit zur organisierten internationalen Wirtschaftskriminalität und die im Markenstrafrecht begegnenden Tätergruppen. Schließlich erörtert der Verfasser die relevanten Gesichtspunkte einer Inkriminierung von fahrlässigen Markenrechtsverletzungen de lege ferenda.

Infringements of trademark rights detrimentally affect the socioeconomic benefits arising from trademarks for producers, merchants, consumers and the general public. The present analysis examines issues of the mental state of criminal offences against trademark rights. For this purpose the author develops a fundamental and universal system of imputation regarding the mental state of actions relevant for a crime. Such system is thereafter used and developed further to solve the problems of the mental state of criminal offences against trademark rights.
