Sommario/riassunto	Dark Emu puts forward an argument for a reconsideration of the hunter-gatherer tag for precolonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing, harvesting, irrigating and storing - behaviours inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence comes from the records and diaries of the Australian explorers, impeccable sources.
