Sommario/riassunto	Cancer is a disease responsible for several million annual deaths among humans, worldwide. However, advances in healthcare - which include breakthroughs in science and medicine as well as access to medical treatment - have improved the survival rate of cancer patients over the last few decades. Therapeutic Revolution relates the story of one of the great scientific tales of the twentieth century: how the field of medical oncology was created and its development owing to medical and scientific breakthroughs. The book unfolds the pre-clinical and clinical concepts and innovations that led to the
