

1. Record Nr.	UNINA9910465408803321
Titolo	Particle physics at the tercentenary of Mikhail Lomonosov [[electronic resource] ] : proceedings of the Fifteenth Lomonosov Conference on Elementary Particle Physics, Moscow, Russia, 18-24 August 2011 // editor, Alexander I. Studenikin
Pubbl/distr/stampa	Singapore ; ; Hackensack, NJ, : World Scientific, c2013
ISBN	1-299-28114-1 981-4436-83-6
Descrizione fisica	1 online resource (481 p.)
Altri autori (Persone)	StudenikinA. I
Disciplina	539.72
Soggetti	Nuclear astrophysics Particle acceleration Particles (Nuclear physics) Quantum field theory Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Faculty of Physics of Moscow State University, Interregional Centre for Advanced Studies."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Fifteenth Lomonosov Conference on Elementary Particle Physics - Sponsors and Committees; Ninth International Meeting on Problems of Intelligentsia - Presidium; Foreword; CONTENTS; Physics at Accelerators and Studies in SM and Beyond; Searches for the Higgs boson with the CMS A.V. Gritsan, on behalf of the CMS Collaboration; 1 Introduction; 2 Data analysis; 3 Results; Acknowledgments; References; ATLAS status and recent results A. Cheplakov, on behalf of the ATLAS Collaboration; 1 ATLAS detector; 2 Physics performance; 3 Summary of the selected physics results; 4 Conclusions; References Higgs searches at ATLAS C. Solans, on behalf of the ATLAS Collaboration1 Introduction; 2 SM Higgs boson search channels in ATLAS; 3 Combined SM Higgs boson search in ATLAS; 4 Conclusions; References; The MPD@NICA project at JINR A. Litvinenko, for the NICA/MPD Collaboration; 1 Introduction; 1.1 Motivation; 1.2 MPD concept; 2 The MPD detector subsystems; 2.1 Time Projection Chamber

(TPC); 2.2 Time-of-Flight system; 2.3 Electro Magnetic Calorimeter; 2.4 Inner Tracker System; 2.5 The Other Detector Subsystem; 3 Conclusion; References; Recent results from HERA collider S. Levonian; 1

#### Introduction

2 Inclusive measurements and proton structure3 Searches of new phenomena at HERA; 4 Jet production in low  $x$  regime; 5 Conclusions; References; Electroweak and QCD Physics with the Tevatron A. Alton, for the D0 and CDF Collaborations; 1 Introduction; 2 QCD results; 2.1 Multiparton interactions; 2.2 Di-photon results; 3 Electroweak physics; 3.1 Forward-Backward asymmetry; 3.2 Z-Boson pair production; 3.3 W-Boson production in association with di-jets; 4 Conclusions; Acknowledgments; References; Anomalous like-sign dimuon charge asymmetry G. Borissov, on behalf of D0 Collaboration

First LHC constraints on anomalously interacting new vector bosons M. Chizhov, V. Bednyakov, I. Boyko, J. Budagov, M. Demichev and I. Yeletskikh1 Chiral boson model; 2 The first experimental constraints on the chiral bosons; References; Jets at TEVATRON and LHC M. V. Tokarev and T. G. Dedovich; 1 Introduction; 2 z-Scaling; 3 Self-similarity of jet production at LHC; 4 Conclusions; References; SUSY searches at ATLAS M. Primavera, on behalf of the ATLAS Collaboration; 1 Introduction; 2 Search for supersymmetry in final states with missing transverse energy; 2.1 0-lepton search

2.2 1-lepton search2.3 b-jet search; 2.4 2-lepton search; 2.5 2-photon search; 3 e resonance search; 4 Stable massive particle search; 5 Conclusions; References; Searches for supersymmetry with the CMS experiment A. Cakir, on behalf of the CMS Collaboration; 1 Introduction; 2 SUSY searches; 2.1 Results for hadronic SUSY searches with T parameter; 2.2 Results for leptonic SUSY searches; 3 Interpretation of results and outlook; References; Photon and di-photon production at ATLAS M. Delmastro; 1 Overview; 2 Photon selection, reconstruction and identification in ATLAS; 3 Background subtraction

#### 4 Cross section measurements

---

#### Sommario/riassunto

This volume is devoted to a wide variety of investigations, both in theory and experiment, of particle physics such as electroweak theory, fundamental symmetries, tests of the Standard Model and beyond, neutrino and astroparticle physics, heavy quark physics, non-perturbative QCD, quantum gravity effects, and present and future accelerator physics.
