Sommario/riassunto

In the wake of the global financial crisis, leading industrialized countries have managed to show only a gradual recovery, while East Asian economies have surged ahead. In particular, China achieved growth in excess of 10% in 2010 and is expected to continue growing at a rapid pace. It appears that in the coming years, East Asia will play an even greater role as a growth center leading global economic expansion. Following the Asian currency crisis of 1997-98, consumption and investment in the region decreased considerably, and East Asian economies recovered on the strength of exports. Presentl
