Interferences: A Conflict over Biodiversity and Ownership in the South

of Brazil; 17 The Juridical Hospital: Patient-Citizen-Consumers

Claiming the Right to Health in Brazilian Courts; Contributors; Index

Sommario/riassunto

The essays in this volume study the creation, adaptation, and use of science and technology in Latin America. They challenge the view that scientific ideas and technology travel unchanged from the global North to the global South - the view of technology as 'imported magic'. They describe not only alternate pathways for innovation, invention, and discovery but also how ideas and technologies circulate in Latin American contexts and transnationally.
