	Sommario/riassunto	In this study international legal experts explore legal concepts and contexts from diverse national and disciplinary perspectives. Themes

range from legal and normative pluralism to the development of state law and legal systems, and from law's rhetoric and the potential utility of alternative vocabularies to the polyjurality of the present. The study combines theoretical analyses and case studies to create a rich picture of present scholarship on laws and norms and the state of contemporary legal complexity, each crossing traditional boundaries.
